

Week 2

AI Fluency - Prompting Fundamentals on Real Tasks

Name: Sibgha Mursaleen

Date: 14 July 2026

Real Task

Task: Build a landing page for a car showroom website.

Naive Prompt

Prompt: Build me a landing page.

Output

Notes

- **Technique:** Naive prompt
- **What changed?** No guidance or context.
- **What improved?** A basic landing page was generated.
- **What still failed?** The page was generic and lacked a clear audience or purpose.

Version 1 – Role Assignment

Prompt: You are an expert frontend designer. Build me a landing page.

Output

Notes

- **Technique:** Role Assignment
- **What changed?** Assigned the AI a professional role.
- **What improved?** The design became more polished and design-focused.
- **What still failed?** The AI still didn't know the project's purpose.

Version 2 – Context & Motivation

Prompt: You are an expert frontend designer. This landing page is for my frontend portfolio. I want to show founders I can build professional startup websites. Build me a landing page.

Output

Notes

- **Technique:** Context & Motivation
- **What changed?** Added the project's purpose.
- **What improved?** The landing page aligned better with my portfolio goals.
- **What still failed?** The unrelated information ("my dad name is Mursaleen") did not improve the output and showed that irrelevant context does not help.

Version 3 – Few-shot Example

Prompt

Good Hero:

"Launch your startup with confidence."

Good CTA:

"Book a Demo"

Now build my landing page.

Output

Version 3 matched the example's pattern by generating a short, confident hero statement and a clear, action-oriented CTA instead of generic marketing copy.

Notes

- **Technique:** Few-shot Example
- **What changed?** Added an example of good copy.
- **What improved?** The AI followed the style of the example and produced stronger headlines and CTAs.
- **What still failed?** Some supporting sections remained generic.

Version 4 – Output Structure

Prompt

Use this structure:

- Hero
- Features
- Pricing
- FAQ
- CTA

Output

The landing page was reorganized into Hero, Features, Pricing, FAQ, and CTA, making the content easier to navigate.

DAHARKI, SINDH — FOUNDED BY MURSALEEN

DRIVE HOME WITH CONFIDENCE.

Al-Faisal Motors puts Daharki families into quality new and used vehicles — honest pricing, inspected cars, and support that doesn't end at the sale.

WHY AL-FAISAL

BUILT FOR REAL BUYERS, NOT JUST BROWSERS

Every part of how we sell cars is designed to remove the guesswork and pressure from buying one.

INSPECTION

FULL MECHANICAL CHECK

Every used car is inspected end-to-end for engine, chassis, and electrical condition before it's listed.

PRICING

NO HIDDEN CHARGES

The price we quote is the price you pay. No last-minute fees, no surprise add-ons.

PAPERWORK

REGISTRATION HANDLED

We manage the transfer and registration paperwork so you're not stuck at the RTA office.

TRADE-IN

FAIR EXCHANGE VALUE

Bring in your current car for a transparent valuation and roll it straight into your next purchase.

SUPPORT

AFTER-SALE GUIDANCE

Questions after you drive off the lot? We're a phone call away, long after the deal is closed.

SELECTION

STOCK UPDATED WEEKLY

New and used arrivals refreshed regularly — call ahead and we'll hold what fits your budget.

BUYING PLANS

PRICING THAT FITS YOUR BUDGET

Rough starting ranges — every quote is finalized after inspection and a conversation with you.

STARTER

Trade-in accepted

[BOOK A TEST DRIVE](#)

PREMIUM

Rs 50 Lac

Latest models, top trims, priority service

Newest arrivals, top condition

Priority paperwork processing

Dedicated after-sale contact

[ENQUIRE NOW](#)

Notes

- **Technique:** Output Structure
- **What changed?** Specified the desired layout.
- **What improved?** The output became more organized and easier to follow.
- **What still failed?** Better organization did not automatically improve the quality of every section.

Version 5 – Step Decomposition

Prompt

Think step by step.

- Decide the audience.
- Plan the sections.
- Write the copy.
- Review the landing page.

Output

- Identified the target audience.
- Planned the page sections.
- Refined the copy.

- Reviewed navigation, responsiveness, and usability before presenting the final version.

Notes

- **Technique:** Step Decomposition
- **What changed?** Asked the AI to solve the task step by step.
- **What improved?** The AI showed its planning process, resulting in a more structured and polished landing page.
- **What still failed?** Some design decisions still required my own judgment.

Cross-Model Comparison

Claude	ChatGPT
More design-focused	More explanatory
Strong visual hierarchy	More detailed reasoning
Better landing page copy	More structured descriptions
