

Week 3

AI Fluency – Assignment 2: Curate Your Images

Name: Sibgha Mursaleen

Date: 16 July 2026

Portfolio Section	Image	Source
Hero	Professional photo	Real
Hero Background	Abstract geometric background	AI
CRUD API	Swagger UI, PostgreSQL, Docker screenshots	Real
VNIAS-IJILS Backend	Project screenshots	Real
Complaint Management System	Dashboard and database screenshots	Real
E-commerce Full Stack	Admin dashboard and API screenshots	Real

Real vs AI Decisions

I used a real professional photo for the hero section because it represents me authentically. All project images are real screenshots to accurately showcase my work and provide genuine proof of my technical skills. AI-generated imagery was used only for the decorative hero background, where it enhances the visual design without misrepresenting any project.

Rejection Note

I rejected an AI-generated hero background that used bright neon colors and overly complex futuristic effects because it distracted from the portfolio content and conflicted with my calm, engineering-focused Identity Kit. I selected a minimal geometric background instead because it complements the design while keeping the focus on my projects and technical work.
